

# Dutch Doors

Scan for  
More Information

Nothing says classic Americana like a Dutch door. Dutch doors are a practical way to connect indoor and outdoor space, giving you the perfect solution for your application and climate. Simpson can turn almost any door into a Dutch door allowing for ultimate customization in making your space special.

- Most door styles can be dutched, as long as it has solid wood across the area to be cut, like a flush door or a door with an intermediate rail.
- Choose a door design that fits your architecture. Dutch doors are a fit for both traditional and contemporary styles.
- Dutch doors can be constructed in a few ways (see right). Choose the type that works best for your application.
- Shelves now available for your exterior or interior dutch door.
